

Special Request for Year End Report Legislature Mini-Report 2002

- a) How many total people participated in you WMA meetings? **136**
- b) How many total people have been directly involved in a WMA sponsored educational workshop, training, event etc? **144**
- c) How much funding (can be inkind) or contributed services/materials (dollar amount) was allocated/donated to WMA business, planning, events, coordinated control projects? (wild guess here, included roughly 20/hour for donated time - don't include all weed control projects in the county, but do include those that involve the top priority species and goals of the group). **\$32,000**
- d) Is the SB1740/ AB1168 money being formally matched (or is a match) by any monetary grants, county allocations, gifts of \$? How much? (This is more restrictive than above - cash only) **None**
- e) How many weed populations were eradicated (you think) in 2002? **None**
- f) How many acre of weeds were control with SB1740/AB1168 in 2002?
- Capeweed – 1 acre**
 - European Beachgrass – 3 acres**
 - Jubata Grass – 1 acre**
 - Scotchbroom – 3 acres**
 - Yellow Star Thistle – 2 acres**
 - Yellow Bush Lupine – 7 acres**
 - Tansy Ragwort – 20 acres**
 - Total Acres = 37 acres**
- g) Provide one or two paragraphs describing the goals of your WMA, major accomplishments for last year, benefits to you county

The Humboldt Weed Management Area's (HWMA) primary goal is to enhance the effectiveness of existing weed management programs and advanced good land stewardship practices, public awareness, integrated pest management, and the knowledge and skills necessary to manage invasive weeds. This goal is accomplished by uniting private landowners, organizations, and agencies with jurisdiction over designated lands, in mapping, planning, monitoring, and conducting research and voluntary weed management programs.

To accomplish our primary goal the HWMA continues to set objectives. Some of our current objectives are 1) to become a multi-county WMA with Del-Norte County by complete a new MOU, 2) continue to update and add to a county wide map of noxious weed species, 3) develop more public education materials and displays, 4) write a county wide weed management plan 5) continue to evaluate HWMA activities.
